

Solutions for Law Enforcement & Public Safety

Effective communications for law enforcement, fire and emergency medical services are essential to the safety and security of every community. Airborne and emergency response teams rely on Novanet solutions to significantly enhance the mobility and efficiency of their critical efforts and enable them to respond more rapidly to events:

- crystal-clear live images for situational awareness
- fast deployment and mobility in the air and ground for voice, video and data communications
- high bandwidth and long range digital video links for multi site connectivity
