

Solutions for Television Broadcasting

Novanet is the trusted provider of innovative broadcast technologies for Canada's leading television networks. We have a comprehensive 'best of breed' product selection and solutions for TV broadcasters, allowing them to collect and distribute content, analyze coverage, trouble shoot quality issues and continuously monitor signal and data. For over two decades we have been considered industry experts and have:

Designed and installed satellite collection, over-the-air broadcast and microwave signal distribution systems

Designed and installed microwave ENG systems

Engineered and supplied many transmitters and wireless camera systems
